The University of Queensland

Accessing Network Drives With VPN: Windows 7

In this guide

- 1. Installing the UQ Virtual Private Network software
- 2. How to map a drive
- 3. Mapping your home folder
- 4. Mapping your shared folders

Installing UQ Virtual Private Network Software

- 1. Open a web browser and load the page http://vpn.uq.edu.au and login with s4403711 and your regular password
 - We suggest using Google Chrome or Mozilla Firefox
- 2. You will be prompted to manually download the software.
- 3. To save the file, click on the **AnyConnect VPN** link

- 4. Open the file you have just downloaded and follow through the prompts to install the software
- 5. Once installed. Click Start and in the search box type in Cisco AnyConnect Secure Mobility Client
- 6. Click on Cisco AnyConnect Secure Mobility Client
- 7. In the address box, please type in **vpn.uq.edu.au** and press the connect button

8. Now login with **s4403711** and password.

You are now connected to the VPN.

If you require access to your shared drives, please continue reading.

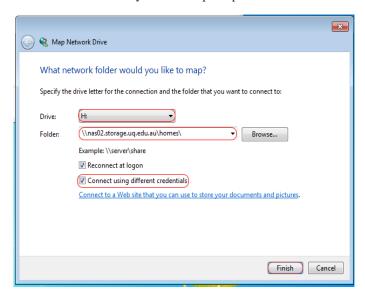

How to map a drive

- 1. Click the **Start** button
- 2. Right click Computer
- 3. Select Map network drive...

Mapping your home folder

- 1. A new window will appear. Select **H:** as the drive letter.
- 2. In the folder path type \\uqstudent\s4403711
- 3. Select both Reconnect at logon and Connect using different credentials
- 4. Then click finish and you will be prompted for credentials.

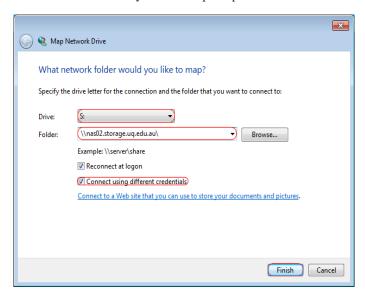

5. Use this format for your username uq\s4403711 with password.

Mapping your shared folders

- 1. A new window will appear. Select **S:** as the drive letter.
- 2. In the folder path type \\nas02.storage.uq.edu.au\Institutes
- 3. Select both Reconnect at logon and Connect using different credentials
- 4. Then click finish and you will be prompted for credentials.

- 5. In the username field, please use uq\s4403711
- 6. Use your regular UQ password in the password field.
